CASAdelDRAGON

Artist Residence | Think Tank | Exhibition space

in the nature CASAdelDRAGON offers the opportunity to participate in alternative horticultural projects throughout the year. Topics such as water management, permaculture, compost, terra preta, beekeeping, food production and preservation can be discussed from the stand and incorporated into your offers.

skills and development In addition to off-grit projects (solar) and alternative horticulture (Aquaponics) we are constantly expanding the infrastructure (Upcycling, BioConstruction) and offer co-construction projects (stone oven, workshops). We also offer photo and video workshops.

Creativity In the artistically creative area we work with (nature) colors, organic and mineral materials and offer knowledge transfer around stone, wood, paper, ceramics, music, dance and theater. A small gallery in the CASAdelDRAGON and a large sculpture garden are available for presentation.

Sustainability “taking salt” by the sea in one of the largest nature reserves by the Sierra de IRTA (22km away), workshops on nutrition and health, waste prevention and recycling

Teambuilding CASAdelDRAGON is an offer embedded in the cohabitation FamiliaFeliz. We offer special seminars on personal coaching and team building.
